PROJECTS

HR Management System(Employee Engagement Module)

Sept 2025 - Nov 2025

- **Refactoring:** Migrating a monolithic codebase to a Modular structure to improve scalability, readability, and overall code maintainability.
- **Asynchronous UX:** Leveraged Vanilla **JavaScript** and **AJAX** to implement peer-to-peer recognition features, enabling real-time updates without page reloads.
- **Secure Data Handling:** Applied **SQL Prepared Statements** and **PHP Session** management to prevent injection attacks and protect sensitive employee data.

School Management System(School Directress Module)

Jan 2026 - Mar 2026

- **Architecture:** Developed a custom MVC framework using Object-Oriented Programming (OOP) to ensure strict separation of concerns and modularity.
 - **Security & RBAC:** Engineered a secure Role-Based Access Control system with password hashing and unique permission sets for Administrative roles.
 - **Document Workflow:** Built an automated Approval Pipeline for multi-file report submissions, utilizing relational database logic to track document lifecycles.
 - **Data Integrity:** Designed a normalized **MySQL** schema to manage complex academic records and audit trails for school-wide concerns.
-
